

Andrew Biele

Board Member

Landscape SA Murraylands and Riverland

MMCCC MEMBER PROFILE

Born and bred in the Riverland, I have lived most of my life in a beautiful area on the Murray River called New Residence and balanced life between the river system, irrigation and dryland farming through our family properties and employment.

I am currently the Farm Manager of Bulla Burra operations, a collaborative farming enterprise based in the Murray Mallee - Loxton. Continuous cropping operation of 10,000 ha consisting of wheat, barley, oats, vetch, lupins, lentils, peas, chickpeas and canola.

I love our land in which we work and play and value its many uses. Ensuring its longevity and restoring the great land we call home is important, allowing it to continue to provide both income and lifestyle.

I am an active member of several other groups and committees including Director of Mallee Sustainable Farming, Riverland/Northern Mallee Spray Drift Working Group, Murray Mallee Bushfire Management Committee (BMC), Chair of the Loxton Drought Hub and Loxton Pistol Club Secretary.

My short time serving as a board member of the Landscape SA Murraylands and Riverland Board has been rewarding. It provides me with the opportunity to represent industry and the levy payers of my region. Sharing what they want to see happen in their own backyards and assist the landscape movement to continue in the direction of our community's needs while serving the environment sustainably.
