

Ken Donaldson

General Manager Operations

Murray Zircon

MMCCC MEMBER PROFILE

I am an experienced Operations Manager with over 30 years' experience in the mining industry, and degrees in Engineering and Technology Business Management.

I grew up in Adelaide, where I met my partner at my first school holiday work experience. We worked together across the country for 20 years, before returning 10 years ago to live on the outskirts of Adelaide. We have two young boys who keep us busy, along with an incredibly old and very demanding, stumpy tail red heeler.

The power of a team is something I strongly believe in, recognising individuals' unique contributions to create something more powerful than the sum of the parts.

I am immensely proud to be part of the Murray Zircon team, optimising the Mercunda strandline operations, in synchrony with the environment and the community.
